

LEGEND

SPECIAL FLOOD HAZARD AREAS INUNDAED BY 100-YEAR FLOOD

- Zone A: No base flood elevations determined.
- Zone AE: Base flood elevations determined.
- Zone AH: Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined; for areas of small size flood depths also determined.
- Zone AO: Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined; for areas of small size flood depths also determined.
- Zone A99: To be protected from 100-year flood by Federal flood protection system under construction; no base flood elevation determined.
- Zone V: Coastal flood with velocity hazard (wave action); no base flood elevations determined.
- Zone VE: Coastal flood with velocity hazard (wave action); base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

Zone X: Areas of 500-year flood; areas of 100-year flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 100-year flood.

OTHER AREAS

Zone X: Areas determined to be outside 500-year floodplain.

Zone D: Areas in which flood hazards are undetermined.

UNDEVELOPED COASTAL BARRIERS

Identified: 1983
Coastal barrier areas are normally located within or adjacent to Special Flood Hazard Areas.

LEGEND

To obtain more detailed information in areas where base flood elevations (BFEs) and/or floodway limits have been determined, users are encouraged to consult the Flood Profile and Floodway Data Report for the community. This report is available from the Federal Emergency Management Agency (FEMA) or the community's local flood insurance administrator. The report contains detailed information on the BFEs and floodway limits for the community. The report also contains information on the flood insurance rates for the community. The report is available for purchase from FEMA or the community's local flood insurance administrator. The report is available for purchase from FEMA or the community's local flood insurance administrator.

NOTES

This map is for use in determining the National Flood Insurance Program's flood insurance rates. It does not necessarily identify all areas subject to flooding, particularly those areas of small size or of low elevation. For more detailed information on flood hazards, consult the Flood Insurance Study Report for the community. The community map repository should be consulted for more detailed data on flood hazards and for information on floodway delineation, prior to use of this map for property purchase or construction purposes.

Areas of Special Flood Hazard (100-year flood) include Zones A, AE, A1, A99, AH, AO, V, VE, and D.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodway areas were computed at cross sections and interpolated between cross sections. The floodway areas were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Report for more detailed information on floodway widths.

Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

This map may incorporate approximate boundaries of Coastal Boundaries, Resource System Units, and/or Other Protected Areas established under the Coastal Barrier Improvement Act of 1990 (P.L. 101-591).

For community map repository information, prior to countywide map, see Section 6.0 of the Flood Insurance Study Report.

For additional map panels and base map source see separately printed Map Index.

MAP REPOSITORY
City of Santa Clara
1500 Wilburton Avenue, Santa Clara, CA 95050
(Maps available for reference only, not for distribution)

INITIAL IDENTIFICATION:
APRIL 12, 1974
FLOOD HAZARD BOUNDARY MAP REVISION:
FEBRUARY 11, 1977
NOVEMBER 15, 1977

FLOOD INSURANCE RATE MAP EFFECTIVE:
JULY 16, 1998

FLOOD INSURANCE RATE MAP REVISIONS:
Map revised January 20, 1999 to update corporate limits, to change base flood elevations, to change special flood hazard areas, to change water designations, to add roads and road names, and to reflect updated topography information.

For description of Elevation Reference Marks, See Panel 060350 0005 D.

To determine if flood insurance is available in your community, contact an insurance agent to call the National Flood Insurance Program at (800) 638-6620.
